

GUIDELINES: Microscopy Knowledge Exchange Visits 2022

Overview

To promote and reward the significant contributions of staff from research facilities in Australia and New Zealand, Australian Microscopy and Microanalysis Society (AMMS), Microscopy New Zealand Inc (Microscopy NZ) and Microscopy Australia will support up to nine (9) Knowledge Exchange Visits (\$2,500ea) to allow applicants to undertake highly productive laboratory visits.

Facility staff will get the opportunity to participate in a visit to another facility to exchange training, expertise and mentoring skills to benefit their career, their colleagues and the host facility. The research experience and collaborative opportunity will benefit the successful applicants and enhance the support provided by the host facility to their users.

Eligibility/Criteria

Applicants need to meet the following criteria for their application to be accepted:

- The applicant must, at time of application submission, be a current member of AMMS or Microscopy NZ.
- Applications must be approved and supported by the applicant's home institution (e.g., employer or university) and by the host facility.
- The visit can be either international or domestic (e.g., interstate).
- Applications must outline the purpose and proposed dates of the exchange visit.
- A written agreement between the applicant's home institution and proposed host institution is required before travel commences.

Conditions

Duration

The Knowledge Exchange Visit must be between one (1) and three (3) weeks in length and be completed by 30 June 2023. The exact duration and schedule of the visit must be agreed in writing between the applicant and the host facility. The primary purpose of the trip is to support training visits but can be combined with conference attendance.

Financial Support

Each Knowledge Exchange Visit will be awarded funding up to a maximum \$2,500 contribution to travel-related costs. The award is explicitly intended to contribute to the applicant's out of pocket expenses, such as return domestic economy airfare, living costs (meals, local travel, incidentals) and accommodation. It is expected that the applicant's home institution will contribute to any additional travel costs, however, applicants can self-fund additional costs (if required). Please note that the applicant's salary/time and research project costs are not funded through this scheme. All funds must be claimed by 30 June 2023.

Application, Review and Approval Process

Application process

To apply for a Knowledge Exchange Visit, please complete the [online application](#), along with the required attachments:

- Written invitation from the intended host facility (including the purpose and proposed dates for the visit)
- Two-page CV
- [Approval from your institution](#) (supervisor or Facility Director, including confirmation of any co-contribution)

Application closing dates

Applications will be considered in two rounds, closing:

- Monday 2 May 2022 and
- Monday 7 November 2022.

Review process

Representatives from AMMS, Microscopy NZ and Microscopy Australia, will form the review panel. Applications will be assessed on the needs of the applicant and their institution and the outcomes of the proposed visit. The panel will give preference to applications with a wider benefit to facility users, and there will be a focus on early and mid-career researchers. Applicants will be advised of outcomes in a timely manner.

Employer/Institutional Approvals

Please be aware that awardees will need to follow the rules and procedures in place at the home institution concerning travel approval for business travel, especially relating to COVID-19 risk assessments. Please ensure that these approvals are obtained and paperwork is submitted through your home institution for these trips.

Outcomes/Reporting

To facilitate and deepen the knowledge exchange, successful applicants must present a talk or workshop during their visit at the host facility.

To share their experience and knowledge, successful applicants are required to give a presentation on their Knowledge Exchange Visit at their home institution or a locally organised seminar/workshop within three (3) months of their return.

Successful applicants must provide a final report on the achievements and outcomes of their visit within two (2) months of their visit. Please contact Microscopy Australia by email admin@micro.org.au for a copy of the Final Report form.
